

## EXTREMELY RICH GOLD AND IRON MINE IN ARIZONA

(MINING, GOLD )

PINAL, ARIZONA

Listed Price: **\$ 85,000,000**

Listings ID: **CM4440106**

---

### Listing Details

#### Business

#### Description:

**The claims consist of 640 acres of BLM land in the State of Arizona. The property is recorded in Pinal County.**

**A claim evaluation and geological report was done by Ron Parker (who is a long time geologist and expert in the area) and shows that the Claims (640 acres) of land contains at least 19,027,008 PROVEN tons of Magnetite (Iron), and a possible 9,211,024 ounces of gold. At last calculated commodity prices in March 2013 report, this amounts to \$3,805,401,600 in PROVEN magnetite and \$14,714,610,000 estimated gold per 640 acre claim to 200ft in depth. The claims also contain silver, titanium, and other precious metals (see report and assays). The average gold content based upon many assays throughout the area and claim is estimated at .472 ounces gold per ton, while the average Magnetite is 7%. There are much higher percentages of Magnetite on the Claims than the average in the area but this will vary depending on terrain and locations on claim. Other assays have been done in the area just below the claims, out of our same wash and alluvial flow (just property below us) showing gold as high as 4.8 oz per ton. Assays on this Claim have been consistently between .209 opt and 4.8 opt showing results consistent with other assays in the area. The claim is a placer type of mine, in that the magnetite, gold, silver and others are small nano size particles mixed within the sand and soil of the ground. The gold and other precious metals are both attached, and free standing. The site is accessible by a main road that runs near the property. Utilities are close to the property. These claims only have a pilot plant operating, all financial**

<b>Down Payment:</b>	<b>\$ 25,000,000</b>
<b>Gross Revenue:</b>	<b>\$ 15,000,000</b>
<b>Cash Flow:</b>	<b>\$ 8,500,000</b>

**EBITA:** \$ 10,500,000  
**FFE:** \$ 1,000,000 (Included in Price)  
**Real Estate:** \$ 85,000,000 (Included in Price)  
**Form of Ownership:** S Corp  
**Terms and Conditions:** NEGOTIABLE  
**Reason for Sale:** OTHER PROJECTS

**Training & Support:** COMPLETE TRAINING AND SUPPORT

### Operations

**Year Established:** 2002  
**Days & Hours of Operation:** SUN UP TO SUN DOWN  
**Owner Hours:** VARIES  
**Employees:** 7  
**Managers:** 1  
**Absentee Owner:** No

### Location

**Lease Expire:** 0000-00-00  
**Lease Security:** 0  
**Facilities:** The claims consist of 640 acres of BLM land in the State of Arizona. The property is recorded in Pinal County.

### Summary

**Historical  
Summary:**

The 640 acre Claim has a total proven, and possible value of approx \$34 Billion to 200ft. 4 sample holes have been assayed from the claims as well as several assays from various claim owners throughout the area, government reports, 355 drill holes, and studies by the Colorado School of Mines and others confirm the precious metals in the alluvial fan where the claims are located as well as numerous assays from the this claim confirm the reports previously done .

A three month feasibility study was conducted in 2013 from which it was determined to proceed forward with a Pilot Program on Claim #2. The Pilot Program was funded in August 2013 where a processing system was designed and developed to extract and separate the nano precious metals from the soil. Testing was also conducted with various laboratories to determine the processing required to separate the gold, silver and other precious metals. BLM approved the Exploration Plan and 5 acres were allocated within Claim #2 to install and test the processing system, named "The Blue Rose". This "laboratory" system has copywrite processes that were built into the process and is unique to any other extraction/separation process. Our proposal is to integrate this Blue Rose system into the full scale mining operation.

**Owner  
Qualifications:**

MINING EXPERIENCE

**Competition:** a unique property

**Potential Growth:**  
Exploration of the 640 acres

**Financing/Terms:** negotiable
